

### **100% Compressed Wood Fiber No Additives or Binding Agents**

The Superior Pellet Log can be used in place of or along with conventional firewood.

Superior Pellet Fuels recommends using no more than **THREE** Logs at a time.

Logs **WILL** expand considerably during burning, keep clear of glass.

## **Suggested Lighting Method(s)**

### **The Good -Ole- Fashion Way**

Start your fire by whatever method you normally use; kindling and paper, blow torch, bottom up, top-down. Ensure that your fire has adequate air flow and is burning strong. Add Superior Pellet Logs to your established fire. Leave space between Logs to ensure proper air flow.

### **Superior Pellet Log Pucks**

Using a hatchet or log splitter cut Superior Pellet Logs into “pucks”. Place 2 -3 pucks around a fire-starter. After pucks have caught fire and are burning well add Superior Pellet Logs.

### **Existing Fire or Hot Coal Bed**

Superior Pellet Logs are easily added to an existing fire or hot coal bed. It is always best to ensure there is at least a half inch of space between the logs for adequate air flow.

## **Cautions & Warnings**

- **Never leave fires unattended.**
- Always refer to your wood burning devices manual or manufacturers guidelines.
- Do not over fire your stove or appliance. Follow manufacturer guidelines at all times.
- Logs will expand & move while burning. Use caution when opening the door.
- If your stove has a glass front or viewing window make sure that Superior Pellet Logs are placed parallel to the glass, as Logs will expand and shift while burning.
- Superior Pellet Fuels suggests never to burn more than **THREE** Superior Pellet Logs at one time in your standard wood stove or insert to prevent over firing. Pay close attention to your stack temperature until you become familiar with burning Superior Pellet Logs in your wood burning device.

## **Recommended Storage**

**KEEP DRY**

- Superior Pellet Logs are best stored inside.
- Logs can be stored outside but **MUST** be kept **OFF** the ground and well **COVERED**.
- Superior Pellet Logs **DO NOT** like water.
